

Stakeholder briefing: Sunderland Urgent Care

Come and hear what people thought of the proposed changes to urgent care in Sunderland

We have given the public the opportunity to have their say about proposed changes to the way NHS Sunderland Clinical Commissioning Group (CCG) deliver urgent care services.

We've engaged with over 2,507 people, which is over 1.1% of the population during the public consultation phase which ended on 2 September 2018.

The CCG will now enter into a period of 'intelligent consideration' of all the feedback it received during the public consultation period to help inform their decision.

This consideration will include:

- Public feedback sessions including the bespoke travel and transport sessions
- Focus groups held with the voluntary sector
- All letters, emails and phone calls received
- Financial information
- Feedback from clinicians
- Modelling on the number of staff available and people currently using the services

You're invited to the feedback event

We would like to share with you the findings of the draft report on:

- Monday 1 October, 6 - 8pm, Bede Tower, Burdon Road, Sunderland SR2 7EA ([Book your slot here](#))

This event will be streamed live on Facebook at [@Sunderlandhealth](#)

This event will have a British Sign Language interpreter present but if you require an interpreter in a particular language please contact SUNCCG.sccg@nhs.net by 24 September.

We are also looking to put on another event during the day and will confirm this as soon as we are able to.

We look forward to seeing you
